

1

Register for the Service

- Download the Evenli application to your mobile device
- Add your contact details and payment card information
- Start heating!

2

Start heating

- Connect the heating cable
- Select **“Menu” > “Schedule heating”**
- Create either a recurring or one-time scheduled heating program
- Point the camera at the device’s QR code or enter code manually. If the device has multiple sockets, select the socket you are using in the mobile application. If the plug is already charging or heating, the scheduled heating will not replace the ongoing event
- The heating starts

RECURRING HEATING PROGRAM

Create a recurring heating program by specifying the start time, heating duration (up to 2 hours), and the days of the week when the heating program is valid. You can also temporarily disable the recurring heating program.

ONE-TIME HEATING PROGRAM

Create a one-time heating program by specifying the start time and heating duration (up to 2 hours). Heating will start and end at the specified times and will not repeat without reactivation.

The heating price is determined by the property owner. You can check the electricity price at the heating point in the Evenli application. Heating cannot be started with a RFID tag. Heating scheduling is only available on devices that support heating.

3

Stop heating

- Heating ends automatically after the end of the scheduled heating program or by unplugging the cable from the heating device.
- You can also end a scheduled heating program before it ends in the application under **“Charging” > “Stop heating”**

Customer service

Evenli customer service is available on weekdays from 8.00 to 21.00 and on weekends from 10.00 to 21.00 at 010 582 1400 and by email at tuki@evenli.com
